ABOUT ME

Technologies and languages I master:

1. Kotlin
2. Android
3. XML, SOAP 4. JAVA
4. Groovy
5. Gradle
6. JSON
7. GIT

Experience with all stages of Android development process:

1. Continuous integration (Jenkins, AppCenter, etc)
2. Distributing release to clients
3. Developing, testing and implementing test code
4. Publishing apps to the Play Store

I have experience rolling out projects from the initial communication with client and design phases, to understanding the main scope of work, recommending architecture and technologies, setting up development environments, developing new codebase from scratch or working with legacy codebase, and until the release of production app and subsequent support and maintenance.

I worked with different local and international teams of 1 to 15 people, including Team Leader.

In my spare time, other than learning new Android technologies, I also enjoy learning French.
